The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cook 3,295,471. Cook teaches the device claimed absent two retaining blocks. One retaining block is taught at 74. To employ more than one retaining block for the purpose of a more secure hold would have been obvious for one having ordinary skill in the art at the time of the invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Similar folding racks are illustrated by Wolff et al. 5398824; Finger 5,588,543; Burton 1,039,694; Huffman 1,752,985; Garrison et al. 2,131,620.
